

To the workers of Accenture

Accenture is givin us the silence treatment

As decided by the workers meeting in the end of June, the union sent out a request for the company to meet so we could discuss the demands approved in such meeting:

- **90€ salary raise for all;**
- **End of discrimination in the bonus attribution;**
- **35h work week with no salary loss;**
- **The availability of shuttle everyday for everyon;**
- **The terms for going back on site;**
- **Recognition and appreciation of the Analyst function;**
- **Appropriate solution for our mental health care;**
- **Better communication channels with HR.**

Accenture, as usual, gave us nothing but silence. But we have to be appreciated!

This year, Accenture has already distributed \$1.6 billion in dividends to its shareholders.

This is wealth created by us, that takes a toll on our free time, our mental health and our pockets.

Everything is getting more and more expensive and neither the salary nor the food allowance is enough for the daily expenses.

We need an urgent raise in both salary and the meal allowance!

Regarding the shuttle, Accenture keeps dodging its responsibilities.

It's not fair that we're being marked as absent when the company doesn't guarantee transport to workers who can't get home any other way.

Accenture has to take responsibility and offer the solutions it says it provides in their interviews and company propaganda, instead of shifting the responsibilities to BusUp or worse, to the workers.
